- Load and haul
- Drill and blast
- Bulk earthworks
- Mine management
- Plant maintenance
- Haul road construction
- Haul road maintenance

The project

Macmahon was awarded a three year mining contract for the Greenfield Byerwen Coal Mine open-cut project, with operations commencing in August 2017.

The hard coking coal project is located near Glenden in Queensland's Bowen Basin.

Macmahon undertakes all mining operations at the Byerwen Project including drill and blast services.

Current mining activity is focused in the Northern Pit with potential expansion options in the future. With current mining capacity in excess of 30M bcm per year, Macmahon are supporting QCoal in taking advantage of this world class resource.
