

The Complete Package

Macmahon Underground Mining

With more than 20 years experience in underground contract mining, Macmahon has expanded its capabilities to offer our clients a complete suite of underground services.

Since its acquisition of Kalgoorlie based National Mine Management Pty Ltd in 1994, Macmahon has continued to grow and is now one of Australia's leading underground contractors. As part of its continued growth and diversification, Macmahon also acquired the specialist mining services companies, Australian Raise Drilling (ARD) and Combined Resource Engineering (CRE) in 2006.

Headquartered in Perth and with offices throughout Australia and overseas, Macmahon delivers the full suite of underground and surface mining functions plus resource infrastructure development to major projects in Australia, New Zealand, South East Asia, and Africa.

Macmahon's underground mining capabilities now incorporate:

- underground development
- underground production
- raise drilling
- shaft sinking
- shotcreting
- remote shaft lining
- cablebolting
- production drilling
- project management
- plant hire

These capabilities are supported by Macmahon's Engineering operations, which provide:

- mechanical services
- electrical services
- infrastructure construction and
- engineering fabrication

Macmahon's underground mining division has the capacity to adapt to client's requirements, accommodating both large-scale, full service offerings (packaging together its capabilities) or individual specialist services.

Safety is one of the Company's core values and is the first priority for every employee. With an ongoing commitment to continuous improvement, Macmahon's underground mining team applies a strong safety culture to all aspects of its operations.

The Company's adherence to our core values of Safety, Teamwork, Integrity, Prosperity and Environment brings added value to its clients and ensures the attraction and retention of quality people to deliver industry leading project outcomes.
